

Stop watching dashboards.

Work with a coworker that fixes them.

It reads your telemetry, tickets, Slack and email, works the incident end to end, and hands you the fix — or applies it itself. **Your engineers get 4× more done.**

Human-in-the-loop

Database

Slow queries, locks — tunes indexes or files a root-caused ticket.

Auto-fix + ticket

Network

THE LUMI ORCHESTRATOR — CORRELATE, DECIDE, ROUTE

1 • Correlate

Fans in telemetry, logs, tickets, Slack and email — 1,240 signals collapse into one incident story.

2 • Decide

Chooses autonomous, human-in-the-loop, or advisory for each pattern — inside your guardrails.

3 • Orchestrate

Routes the fix to the right coworker, sequencing several when an incident crosses layers.
