

— BUILD ONCE, RUN ANYWHERE

Stop rewriting the same runbook for every site.

One searchable library of workflows, agentic workflows and agents. Run any of them in one click, watch the success rate, and fork a prebuilt automation instead of starting from a blank canvas.

TARGETED

— THREE TYPES — DETERMINISTIC, REASONING, OR ALWAYS-ON

WORKFLOW**Deterministic**

Fixed steps, the same path every time. For procedures that are already known and must not vary.

on schedule → query CMDB → run script → post to Slack

AGENTIC WORKFLOW**Reasoning inside the rails**

A structured flow with AI blocks that diagnose, branch and summarise — bounded by the steps you defined.

on alert → AI diagnose → branch on confidence → remediate or escalate

AGENT**Standing, always-on**

A persistent specialist you direct in plain language. It picks its own path, inside its guardrails.

"find IAM policies that drifted this week" → investigate → report

— A PALETTE THAT COVERS THE WHOLE JOB — EVERY AUTOMATION CARRIES A LIVE SUCCESS RATE

- **Triggers.** Schedule, on alert, webhook, or kicked off by hand.
- **Advanced AI blocks.** Diagnose, decide, branch and summarise.
- **Task actions.** The operational steps themselves.
- **Flow controls.** Branches, loops, waits and approvals.
- **Query sources.** CMDB, monitoring, logs, cloud APIs.
- **Run commands.** Shell and remote execution on targets.
- **Terraform & scripts.** Plan, apply, and your own scripts.
- **HTTP / API actions.** Call anything with an endpoint.
- **Outputs.** Slack, tickets, reports, email.

Cert Renewal · Prod · Agentic	99% success
Nightly Report Export · Workflow	99% success
Patch Window Runner · Workflow	97% success
Terraform Plan & Apply · Workflow	96% success
Backup Restore Drill · Workflow	94% success
Config Drift Rollback · Workflow	93% success
Slow Query Remediator · Agentic	88% success

— ONE LIBRARY. EVERY PLATFORM YOU RUN.

AWS Azure GCP Oracle Cloud VMware Kubernetes Linux Windows Cisco Juniper PostgreSQL
